AMENDMENTS

Please amend the application as follows:

In the Specification:

Please amend the paragraph starting on page 15, line 22, as follows:

To enable selection of a security profile, the security application 52 displays, via output device 34, the list of security rules defined by the security application 52. The list of rules may be categorized as taught in copending U.S. Patent Application No. 09/760,236 entitled, "System and Method for Categorizing Security Profile Rules within a Computer System," filed on even date herewith, (attorney docket No. 10004555-1), which is incorporated herein by reference. Similar to conventional system 12, the system administrator, via input device 31, selects which rules should be enforced and which rules should not be enforced upon activation of the security profile being defined by the system administrator.
